Headers

```
# Header 1 #
## Header 2 ##
### Header 3 ###                (Hashes on right are optional)
#### Header 4 ####
##### Header 5 #####
```

```
## Markdown plus h2 with a custom ID ##          {#id-goes-here}
[Link back to H2](#id-goes-here)

This is a paragraph, which is text surrounded by whitespace.
Paragraphs can be on one
line (or many), and can drone on for hours.
```

Links

```
Here is a Markdown link to [Warped](h\begin{framed}
\begin{verbatim}
ttp://warpedvisions.org), and a literal .
Now some SimpleLinks, like one to [google]

(automagically links to are-you-
feeling-lucky),

a [wiki: test] link to a Wikipedia page, and a link to
[foldoc: CPU]s at foldoc.

Now some inline markup like _italics_,  **bold**, and `code()`.
Note that underscores in
words are ignored in Markdown Extra.
```

```
![picture alt](/images/photo.jpeg "Title is optional")

> Blockquotes are like quoted text in email replies
>> And, they can be nested
```

Lists

```
* Bullet lists are easy too
- Another one
+ Another one

1. A numbered list
2. Which is numbered
3. With periods and a space
```

And now some code:

```
// Code is just text indented a bit
which(is_easy) to_remember();

~~~
```

```
// Markdown extra adds un-indented code blocks too

if (this_is_more_code == true && !indented) {
// tild wrapped code blocks, also not indented
}

~~~
```

```
Text with
two trailing spaces
(on the right)
can be used
for things like poems

### Horizontal rules

* * * *
****
-------------------------
```

```
<div class="custom-class" markdown="1">
This is a div wrapping some Markdown plus.
Without the DIV attribute, it ignores the block.
</div>

## Markdown plus tables ##

| Header | Header | Right  |
| ------ | ------ | -----: |
|  Cell  |  Cell  |   $10  |
|  Cell  |  Cell  |   $20  |

* Outer pipes on tables are optional
* Colon used for alignment (right versus left)
```

```
## Markdown plus definition lists ##

Bottled water
: $ 1.25
: $ 1.55 (Large)

Milk
Pop
: $ 1.75

* Multiple definitions and terms are possible
* Definitions can include multiple paragraphs too

*[ABBR]: Markdown plus abbreviations (produces an <abbr> tag
```
